# **SHIELD: Transforming Cybersecurity Education Through AI, Storytelling and Gamification**

Maja Videnovik

Vladimir Trajkovik

Alex

“Cybersecurity  
is just rules,  
and very  
abstract ones.  
It's boring.”

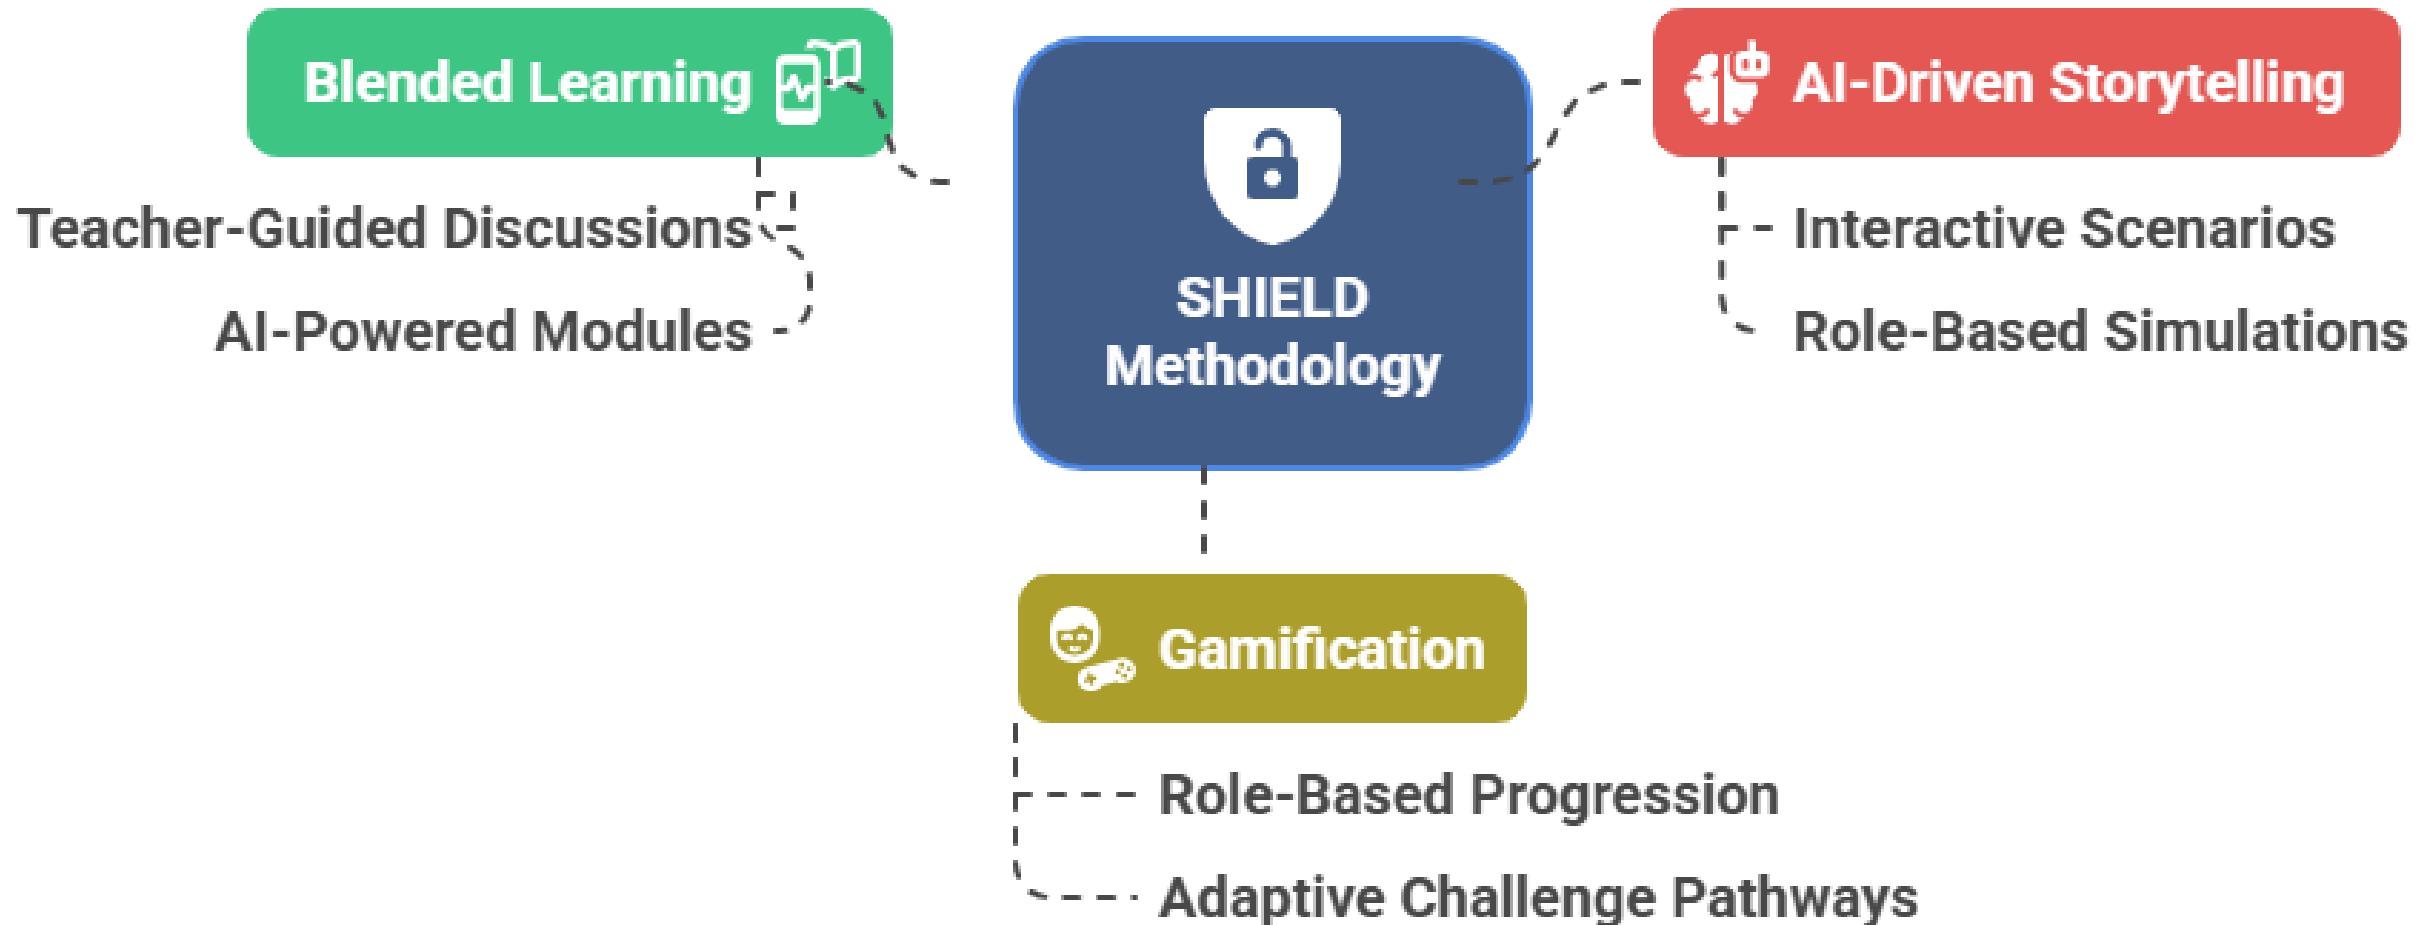

## Challenges in

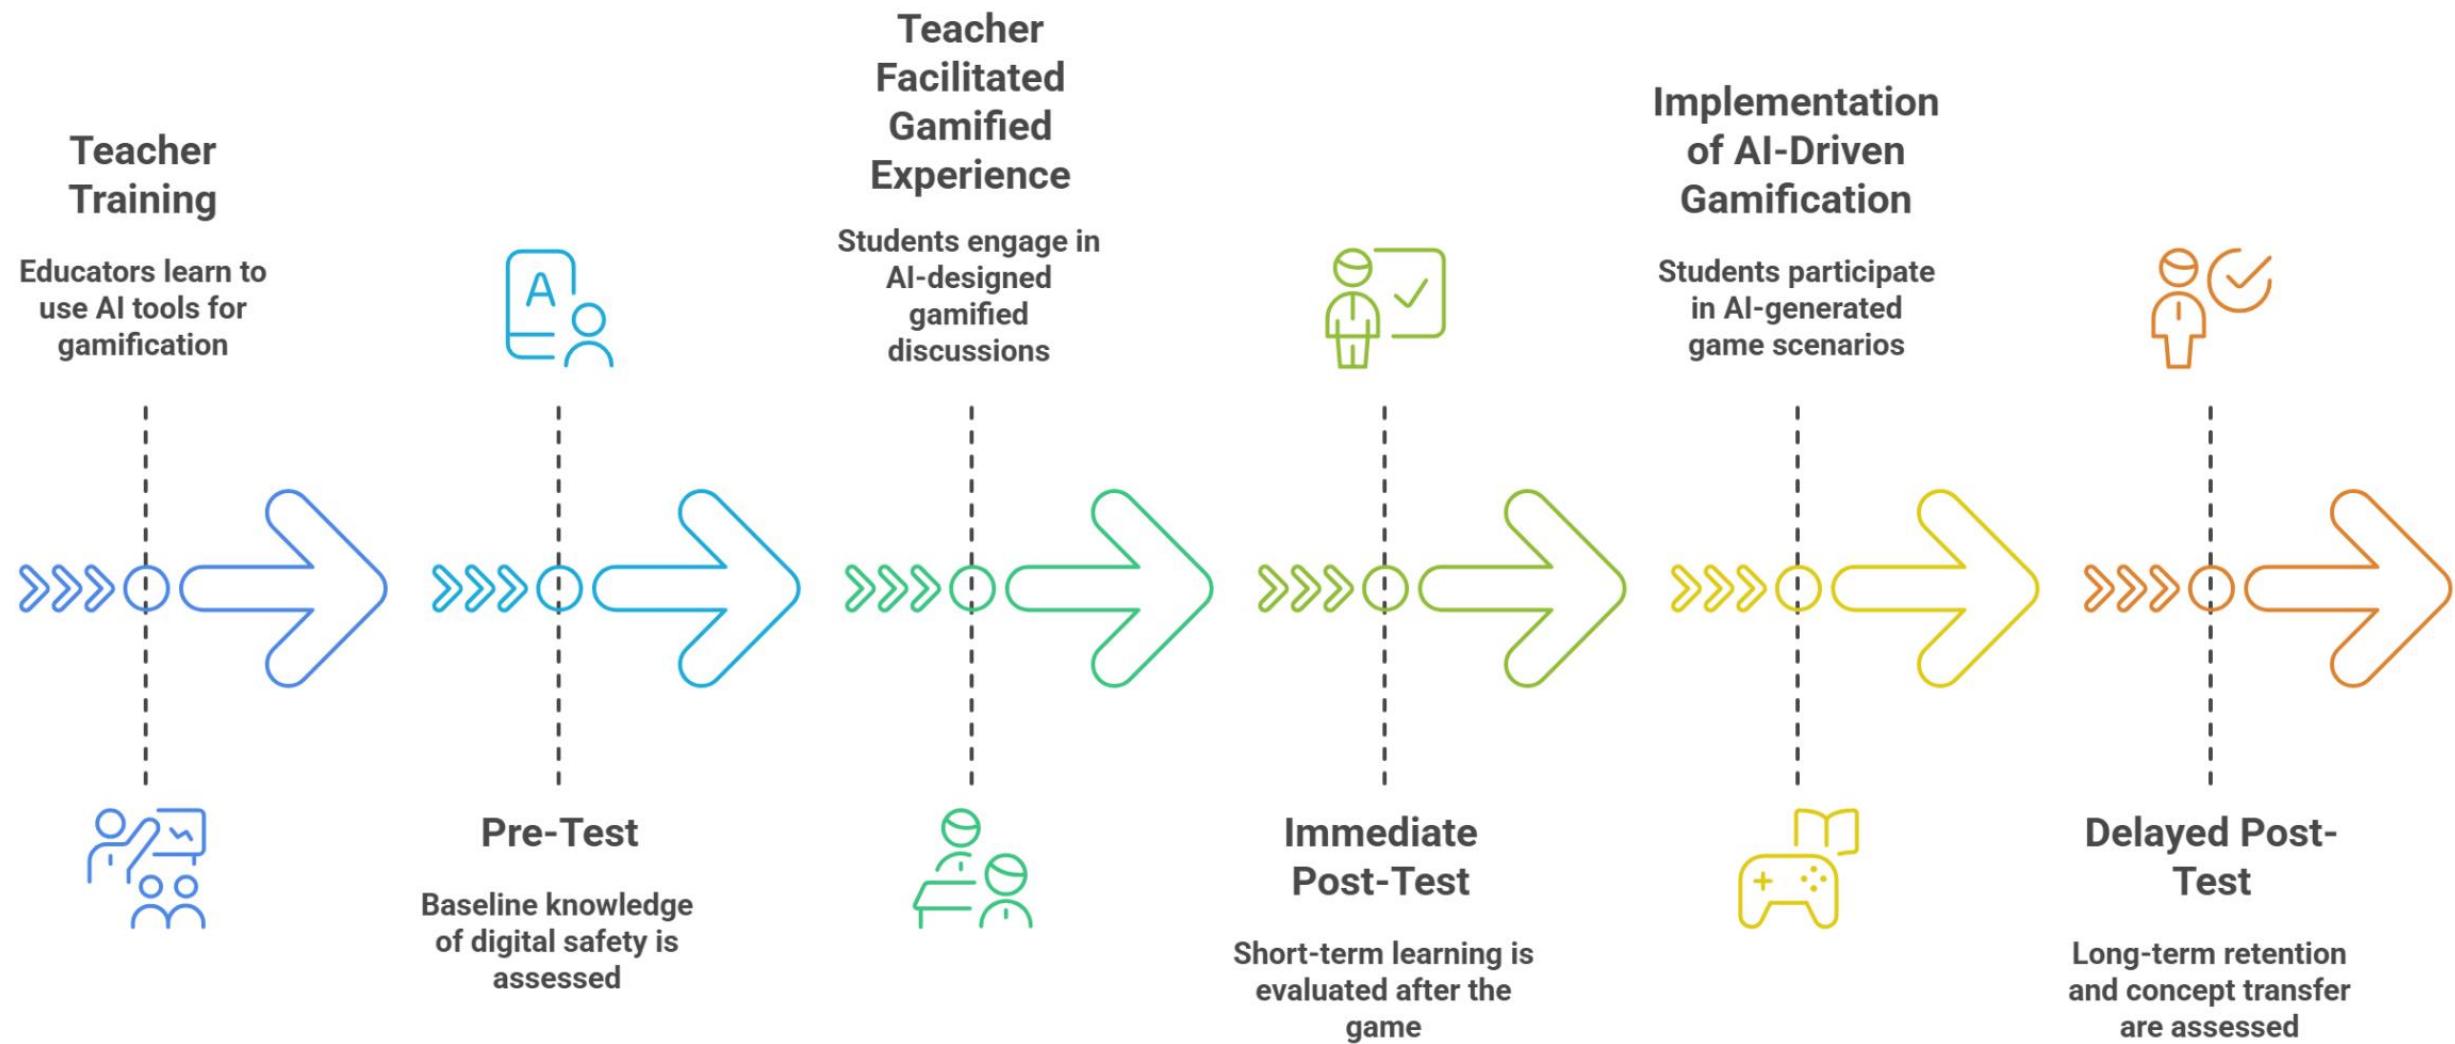

Irina, teacher from a primary school

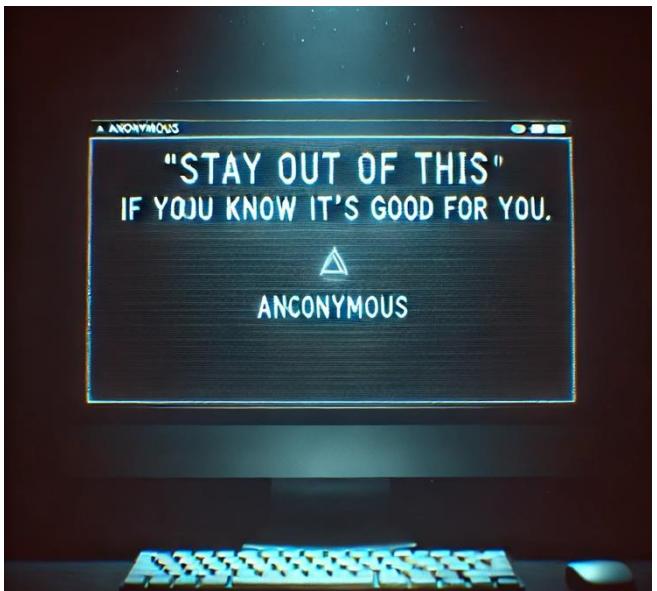

“I know I should teach them online safety, but I don’t know how to make them care.”

# Transforming cybersecurity education into adventure

# EduGame-AI Framework

# Digital Escape room

# Impact:

Students learned more, remembered more, and cared more

---

Enhanced student engagement through interactive and gamified learning.

Improved student understanding of cyber safety and responsible online behavior

Sustained knowledge acquisition, confirmed by testing and feedback.

Increased teacher capacity for digital and cybersecurity education.

More confident teachers during cybersecurity education

Schools recognized alignment with educational priorities

Alex

“The story made it **easier to understand** what cyberbullying really looks like. It helped me know **what to do when** I see it happening.”

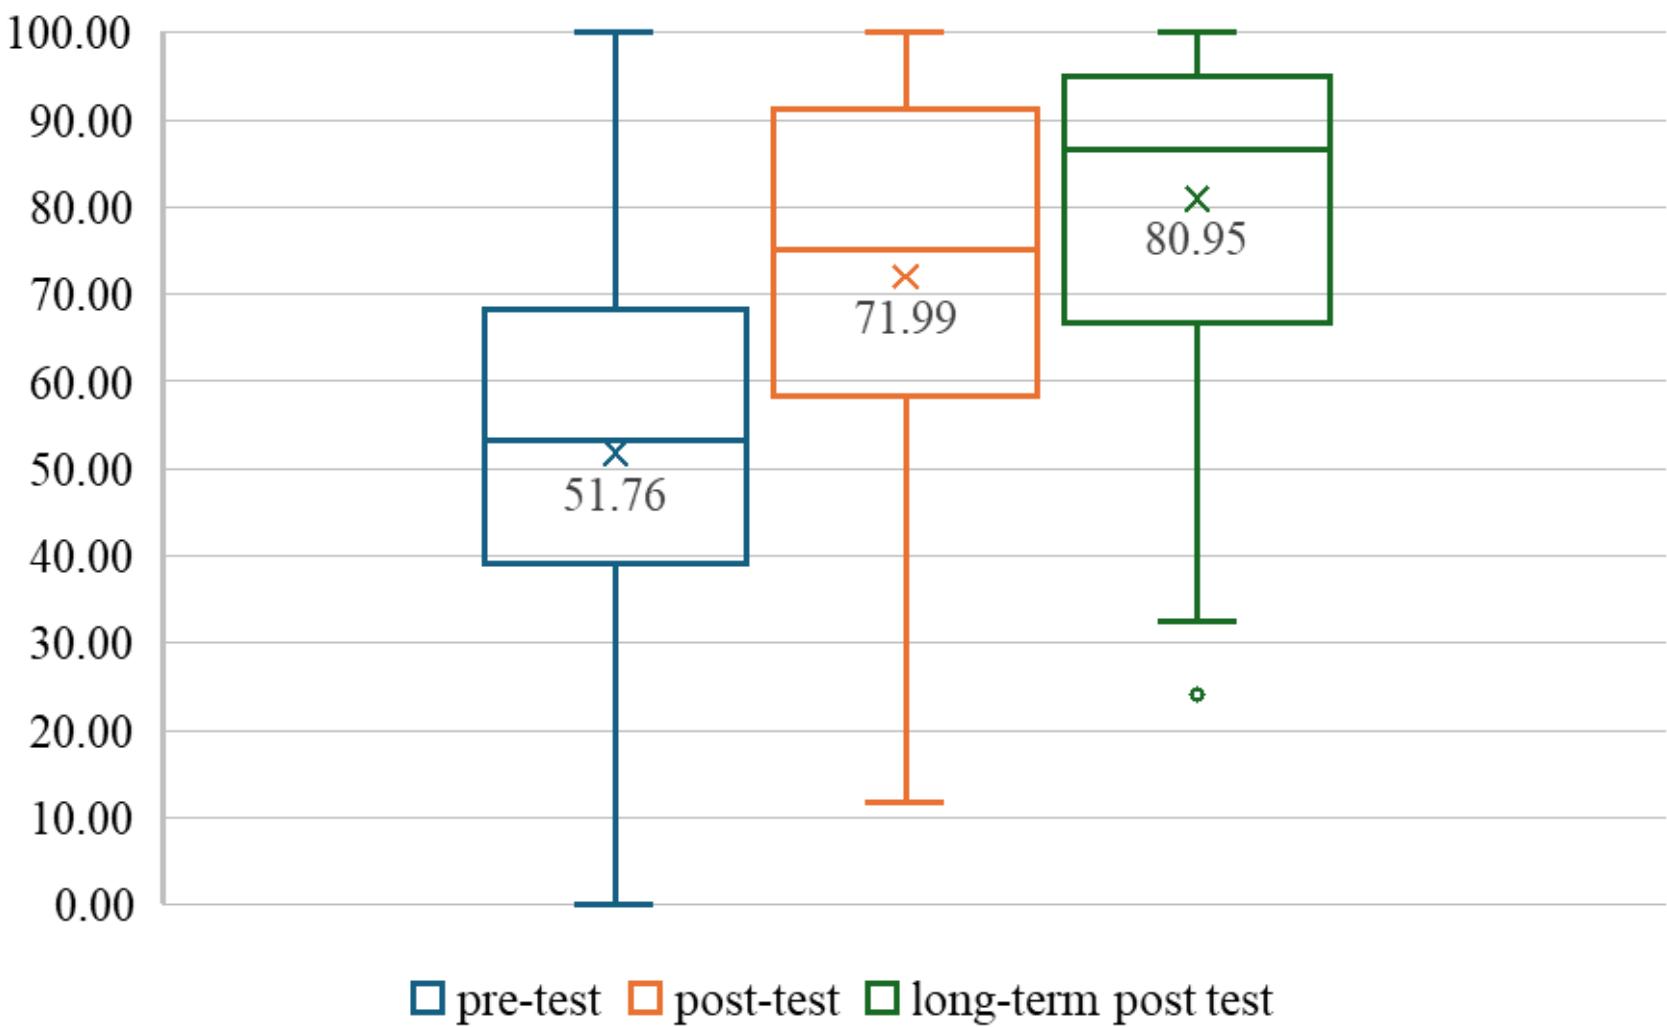

Irina

“The storytelling and gamified lessons made a huge difference. Students were **excited, motivated, and actually discussed real-life cyberbullying experiences** during class.”

# Results:

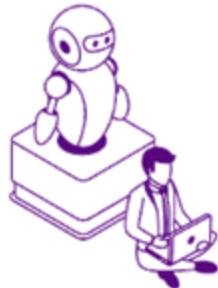

Numbers  
are telling  
the same!

Test Comparison	p-value	Cohen's d	Pearson Correlation (r)
Pre-test vs Post-test	$6.92 \times 10^{-34}$	1.03 (large)	0.47
Post-test vs Long-term Post-test	$2.63 \times 10^{-16}$	0.46 (moderate)	0.70

# Legacy:

## A scalable methodology and a growing community of practice

**A SHIELD workshop model**  
integrating  
storytelling, AI,  
and games

**40+ trained  
teachers**  
equipped to  
create gamified  
cybersecurity  
activities

**More than 2300  
students**  
participated in  
SHIELD workshops  
and improved their  
cybersecurity  
knowledge and  
skills

**Over 30 gamified  
activities** created  
and shared

**A collection of  
digital  
educational  
resources**  
published online

**A teacher  
community**  
capable of  
sustaining the  
model

# SHIELD is not ending — it's evolving

## SHIELD's way forward

### Funding and Support

Utilizing EU and regional initiatives for growth, one application already submitted

### Scalability and Flexibility

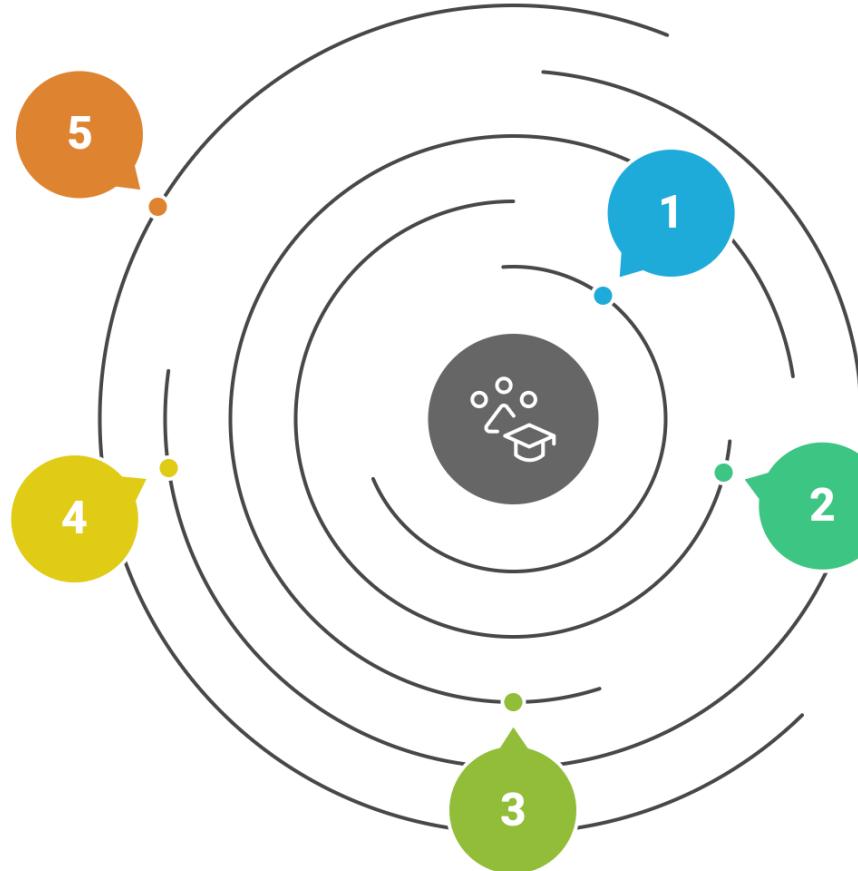

Promoting SHIELD as adaptable models for different topics of interest to society

### Teacher Networks

Educational Resources are kept being developed and used in primary and secondary schools

### Research, Publications and Presentations

Two keynotes at international conferences, three conference papers, 3 presentations at community meet-ups, one journal publication pending, podcasts, webinars, and still going strong...

# Thank you!

Together, we can make  
digital learning  
safe, engaging, and empowering
